

The State of Western Australia

Introduction

- Western Australia (WA) is 2.5 million square kilometres in size, and one third of the Australian land mass.
- Western Australia's population of 3.0 million accounts for approximately 11% of Australia's population of 27 million.
- Western Australia's capital city Perth has a population of approximately 2.3 million.

Economy

- A high-income, export orientated economy.
- Western Australia is one of the most productive and diversified mineral and petroleum regions in the world, with more than 50 mineral and petroleum products being produced in commercial quantities worth A\$233 billion in 2023-24.
- In 2023-24, iron ore was the State's most valuable resource, followed by liquefied natural gas (LNG), gold, lithium, crude oil and condensate, alumina, nickel, copper, and mineral sands.
- Real Gross State product growth slowed to 0.5% in 2023-24 from 3.5% in 2022-23 amid lower mining export volumes, partly due to weather disruptions. Real state final demand rose a strong 5.8% in 2023-24.

The Export Powerhouse of the Australian Economy

Western Australia produced 45% of the nation's merchandise exports in 2024.

The Australian Commonwealth and the States

Commonwealth Government

Allocated powers under the Australian constitution over matters of national interest including defence, external affairs, international trade and commerce, currency and banking.

Commonwealth Taxation Powers

Taxes levied under national legislation include personal income tax, corporate tax, excise and customs duties, royalties on offshore natural resources and the Goods and Services Tax (GST). All revenue (net of administration costs) from the GST is allocated to the states.

State Governments

State governments retain power and responsibility over all matters not delegated to the Commonwealth under the constitution. These include education, public health, police and justice system, roads, railways, ports, electricity and water supply etc.

State Taxation Powers

The States impose and have full constitutional control over payroll taxes, stamp duties, land taxes, gambling taxes and royalties on onshore natural resources.

The Australian Commonwealth and the States - Vertical and Horizontal Imbalances and Equalisation Methods - A Tightly Linked Fiscal Relationship

Vertical Imbalance

The Commonwealth and the States and Territories have a tight fiscal relationship – however, there is an imbalance between revenues and spending requirements:

- The Commonwealth Government collects the majority of total government revenue, and the States and Territories oversee approximately half of total government spending.
- The Commonwealth therefore provides the State and Territory Governments with a large portion of their revenues via grants, which come in three forms – GST, specific purpose, and general revenue grants.

Horizontal Imbalance

The Commonwealth also works to smooth revenue imbalances between the States and Territories through the Horizontal Fiscal Equalisation (HFE) framework which:

- Endeavours to equalise the fiscal capacity of each State and Territory to provide a consistent level of services to residents of each through the relative distribution of GST.
- Is set out in the Intergovernmental Agreement on Federal Financial Relations. GST revenue sharing relativities are updated annually while the methods used for calculating the relativities are reviewed every five years.

Western Australia is a Strong Net Contributor to the Commonwealth - The Commonwealth Government assesses the fiscal capacity of each Australian state to determine a re-distribution of GST revenue to strengthen the capacity of those States with weaker fiscal capacity. In 2018 the Commonwealth Parliament legislated a new way to distribute GST revenue among the states and territories (states). The GST floor sets a relativity below which a state's GST share cannot fall. It creates a minimum per person GST share that each state receives, irrespective of its fiscal circumstances. The floor increased from 0.70 to 0.75 in 2024-25.

Western Australian Treasury Corporation

Overview

- Western Australian Treasury Corporation (WATC) was established as the central borrowing authority for the State of Western Australia by the Western Australian Treasury Corporation Act 1986.
- WATC borrows funds in domestic and overseas markets for lending to over 150 semi-government and local government authorities in Western Australia and provides advisory, investment and foreign exchange services to the Western Australian public sector.
- All borrowings by WATC are guaranteed by the Treasurer on behalf of the State of Western Australia by virtue of section 13(1) of the Western Australian Treasury Corporation Act 1986.

WATC Maturity Profile at 30 April 2025

Western Australia - A Good Value Proposition

- **Good Credit Ratings** – AAA (Stable Outlook) from S&P and Aaa (Stable Outlook) from Moody's.
- **An Export-Driven Economy** – underpinned by its diversified range of resources and strong export growth.
- **Sound Government Financial Management** – with continued vigilance on expense control, but still continuing to build the bigger picture with necessary asset investments.
- **WATC's Active Market Presence** – in domestic and overseas financial markets.
- **Good Liquidity** – with large volumes on issue, qualifying as Level 1 Assets by APRA under Basel III.
